KELLTON TECH

ACCELERATING VALUE-GENERATION WITH KELLTON TECH'S CORE EXPERTISE IN WORKATO

Driven by urgency to become more efficient and agile, enterprises want to tap into the full potential of their on-premise and cloud capabilities at scale. What's needed? A cohesive, next-generation approach to Hybrid Integration.

Workato goes beyond the traditional iPaaS to smartly connect business capabilities for breakthrough strategic returns. It embeds automation across workflows and combines economics of the cloud with security and reliability of on-premise environments to unlock the agility and efficiency needed to become a truly digital enterprise.

With the great power of Workato, get empowered with:

Enterprise Power

- An iPaaS Leader
- AI, Bots & More
- Intelligent Data Loss Prevention

Maximum Security

- Industry-Leading Security and Governance
- Trusted by the Largest Players

Serverless Operation

- Elastic Scaling
- Built-In Redundancy
- No Dev Ops Required

Speed and Simplicity

- No Coding Required
- Instant Deployment
- Automated Error Handling

Features that Make Workato a Platform Beyond iPaaS

Powerful Pre-Built Connectors:
600+ connectors for databases, ERPs, on-prem and cloud apps among more

Read-to-Use Community Recipes:
225,000+ community recipes to map workflows

Digital Native Architecture (DNA):
Create integration recipes and automate tasks spontaneously

RecipeIQ:
Machine Learning algorithm to assist with integration and automation

Bot Customization:
Customize bot recipes and keep them in their related function name

Smart Versioning:
Collaborate and work on the same recipes without losing or damaging other updates

Audit Log:
Track information associated with the recipe's security & performance

Collaborative Governance:
Compliance & security through audit trails, multiple tools & reporting

KELLTON TECH & WORKATO

Kellton Tech is a trusted partner of Workato in driving Automation and Integration services. Kellton Tech's Workato practice team offers an extensive set of tools, services and solutions to help companies seamlessly integrate and automate workflows across their organization. Our experts are well versed in defining the cloud and on-premise integration strategy, architecting integrations, and doing capability assessments, with a deep focus on facilitating scalability.
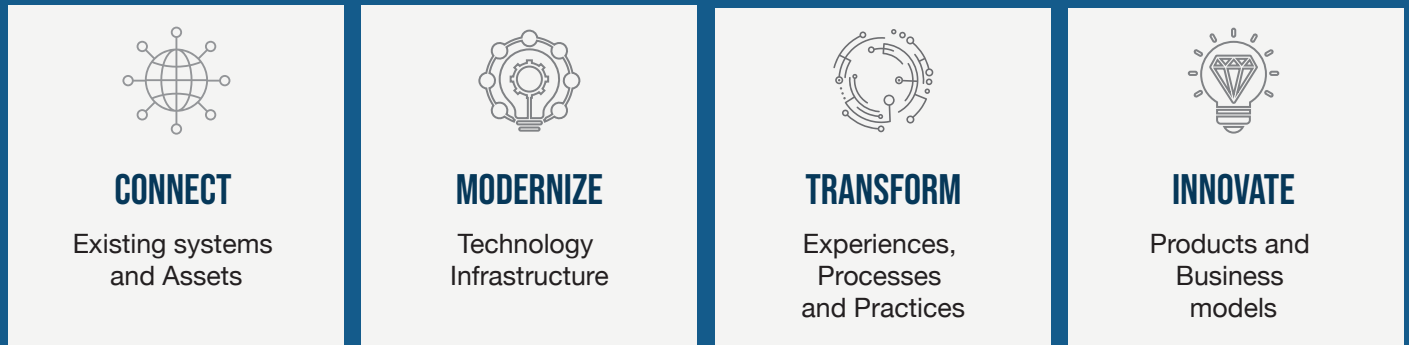

Our Services
