Salient Features of Automation Anywhere Enterprise Automation Platform:

Delivers RPA-as-a-Service

Define your consumption and break free from the complexities of having a server, procuring a license, and setting up your automation infrastructure.

Offers Easy-to-Use Web-Interface

Have the freedom to choose any device, browser, and OS and create intuitive UIs anytime, anywhere.

Consists of Drag and Drop Design

Lean on the plug-in architecture to bundle the best bots and AI capabilities throughout the automation of business processes.

Developed on Microservices Architecture

Create agile process automation easily, all while ensuring the highest levels of security.

Cloud-First Enterprise Automation Platform

Meet the new business demands by being available anytime and anywhere, scalable as required, and free to choose between on-premise and cloud.

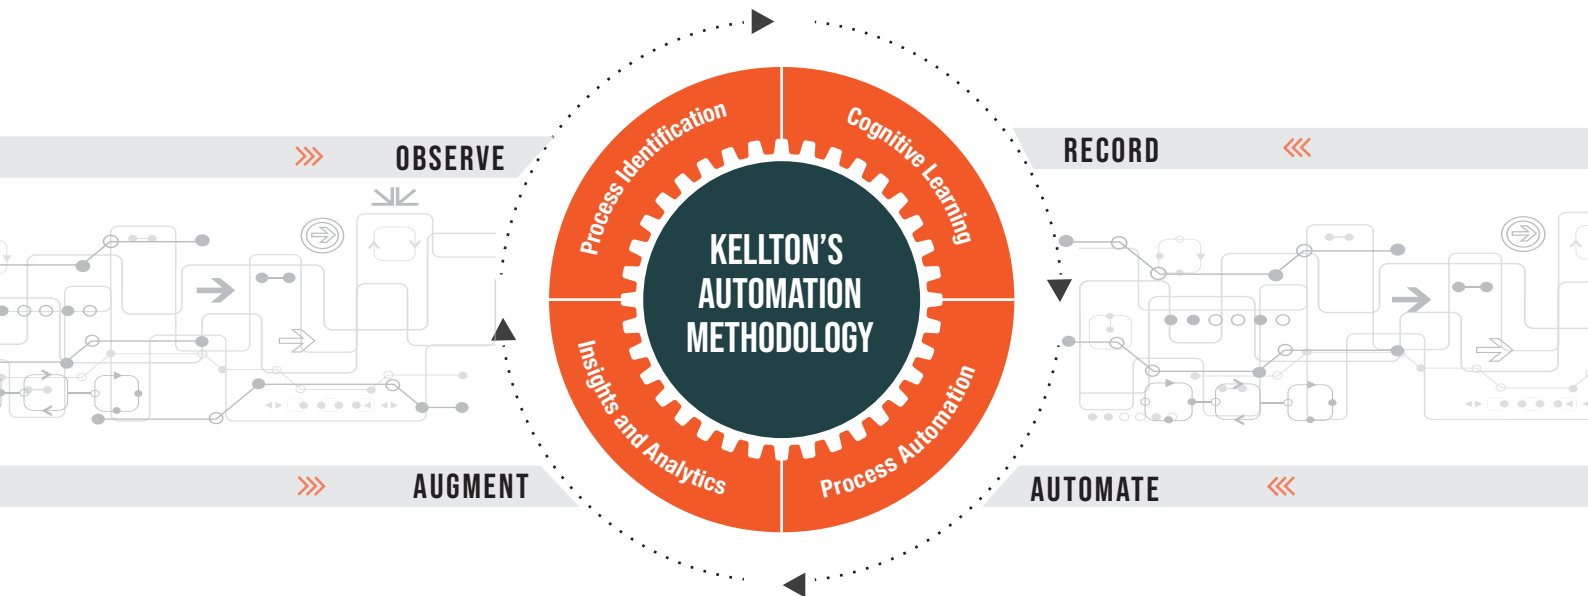

Single Integrated Platform

Scrutinize, manage, and monitor processes through a centralized web control room and practice automation in a consolidated business environment.

One Enterprise Automation Platform for All Users

USER	REQUIREMENT	SOLUTION
 Business User/ Citizen Developer	Web-Based Automation Platform	Browser-based web app with an intuitive UX
 Automation Specialist Developer	End to End Automation Setup	Robust Development Environment powered with smart collaboration.
 Automation Manager/CIO	Resilient Automation Environment with High ROI	Secure, Scalable, low maintenance platform enabling a lower TCO

INNOVATION AWARD**

Benefits of Intelligent Enterprise Automation

Kellton Tech Services

Robotic Process Automation

Our RPA experts help you identify process bottlenecks and employ bots to reinvent processes, augment performance, maximize productivity and throughput, and mitigate risks.

ERP Automation

We have engineered our ERP automation strategies carefully to allow businesses to attain operational efficiency and improve compliance and controls.

Enterprise Automation Services

In collaboration with our automation experts, businesses can build the right strategies and roadmap to achieve end-to-end automation across the enterprise core and deliver time-to-value.

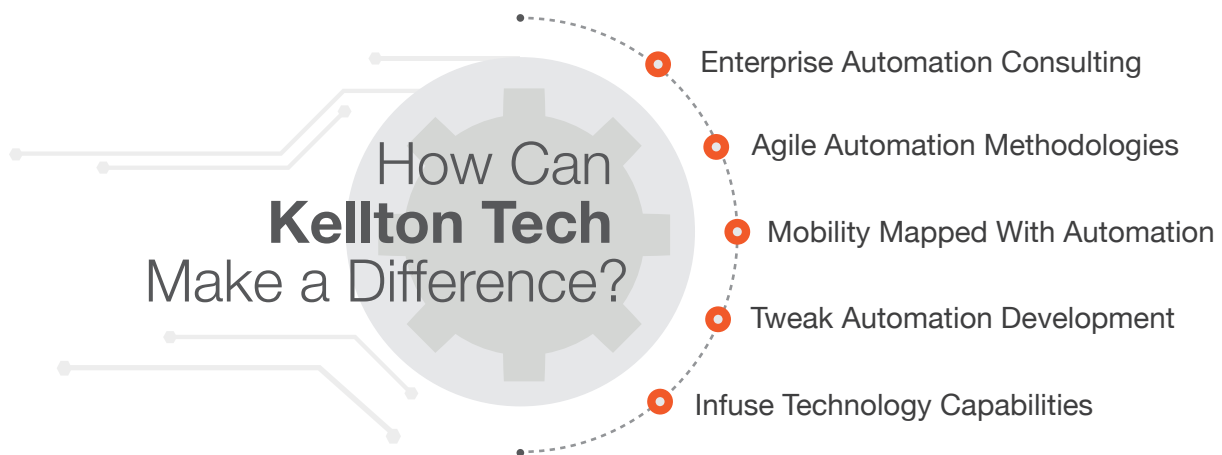

Smart Bot Development and Training

We help harness Automation Anywhere's web control room components to develop and train bots to simulate human behavior and enable businesses to achieve organizational goals.

Kellton Tech Digital Worker:

Optimize and extend bot's RPA capabilities with Kellton Tech's Digital Worker to boost collaboration, productivity, and operational efficiency. Our Digital Worker helps achieve task-oriented end-to-end automation of processes and functions, which involves the human workforce at large. We help you build an intelligent workforce that enables you to create a lean business model and free up your human resources from repetitive low-value work.

Our Clients' Achievement Through Enterprise Automation Expertise

WE OFFER

Global delivery networks with off-shore, near-shore, on-site, hybrid OSDC options

Flexi-cost engagement models including fixed costs, fixed time, time and material

Ready-to-use repository of enterprise-grade tools, practices, approaches, and use cases

A dedicated team of architects, business analysts, and enterprise automation specialists

24*7 support and maintenance, training and assistance

Kellton Tech is a Born Digital technology consulting and services company founded on the belief 'Infinite Possibilities with Technology.' We empower disruptive growth and turn businesses into 'Digital and Smart Enterprises' of tomorrow. Kellton Tech leverages technology as a competitive differentiator for success to craft unique IT solutions for our clients and help them redefine the way they do business for the right real-world impact.
