

KELLTON TECH BOOMI SOLUTIONS

Discover Unmatched Business Agility

As a Dell Boomi certified partner, Kellton Tech can help you to build a truly connected business. With over twenty years of experience providing comprehensive integration and API solutions ranging from advisory and consulting services through architecture and implementation, Kellton Tech is your best source to facilitate the adoption of new business processes, unlock ecosystem opportunities, and to boost productivity.

Dell Boomi is an industry-leading iPaaS platform which enables in-cloud and between cloud integrations to dramatically shorten Time to Value (TTV) and leverage unmatched business agility achieved through a modern approach for tackling modern challenges.

The elastically scalable architecture runs at lightning speed, stays constantly up-to-date, and scales predictably from small to large business use cases supported by self-repair capabilities that ensure 99.99% uptime.

Explore known and
unknown data

B2B/EDI Management

Manage your trading
partner network

API Management

Design, secure and
scale APIs

Flow

Build customer
journeys

BOOMI PLATFORM KEY BENEFITS

Application(s) Integration

Need to integrate multiple SaaS applications, SaaS to on-premise systems, or applications hosted on different public or private clouds? Boomi allows you to seamlessly integrate any number of on-premise and cloud-based applications of varied types.

Hybrid Integration

The Boomi platform has been architected to simplify integration and supports multiple communication patterns such as pub-sub, application-to-application, event-driven, and real-time web services; batch, streaming, and ETL integrations among others. Users can leverage built-in tools, such as parallel processing for large workloads, Atom Workers for real-time processing, and Atom Queue for asynchronous process execution to optimize their use case(s).

Ease-of-Use

Boomi provides an intuitive UI with features such as drag-and-drop mapping tools, re-usable components, pre-built integration processes, and a vast library of connectors to enable you to easily build simple to sophisticated integrations without the need of coding.

Time-to-Value

Leveraging best practices across the entire user base, Boomi provides crowd-sourced intelligence features that drastically improve error resolution and speed up data mapping. Furthermore, Boomi's centralized management and monitoring tools simplify reporting and audit trails to improve efficiency.

TRANSFORM INTO A CONNECTED BUSINESS

Dell Boomi transforms companies into Connected Businesses that can:

CONNECT EVERYTHING:

Connect everything together: people, processes, applications, data, devices, and things.

ENGAGE EVERYWHERE:

Facilitate end-to-end business processes across any channel, device, or platform.

RUN ANYWHERE:

Deploy anywhere - on - premises, in the cloud, or on the edge-online or offline

CORE CAPABILITIES

ACCELERATE
YOUR BUSINESS
WITH DELL BOOMI'S
CORE CAPABILITIES THAT
ALLOW YOU TO:

Integrate: Businesses can break down silos and connect applications and data residing across their hybrid IT landscapes.

Centralize: By synchronizing, centralizing, and enriching their data, organizations can trust it to help them make critical business decisions.

Exchange: With greater interoperability between internal systems and partner ecosystems, businesses can extend the reach of their operations.

Mediate: Exposing existing data as APIs enables companies to securely interact with the new generation of applications.

Flow: With the ability to automate workflows, it becomes easier to create new customer, partner, and employee experiences.

Things: As a complement to the other elements, companies can collect data from physical objects, analyze and correlate it with business data, and use the output to act on new initiatives.
