

Turbocharge your **S/4HANA transformation** journey

SAP S/4HANA plays a crucial role in streamlining your mission-critical business systems into a genuinely simplified enterprise. Companies that have not yet transitioned today could fail to achieve a competitive advantage over laggards that postpone. SAPS/4 HANA accelerates digital transformation for enterprises of all sizes by reinventing business models to improve efficiency, productivity, and operational flexibility.

Assess

- Project scope analysis and requirement understanding
- Perform critical analysis to identify problem areas
- Assess the readiness of existing SAP-centric infrastructure
- · Collect data and get feedback from key stakeholders

Prioritize

- · SAP S/4HANA transition and deployment options
- Discovery/assessment of legacy architecture
- Development of SAP strategy and roadmap
- Develop a relevant business case

Modernize

- · Harmonization of chart of accounts
- · Rationalization of master data
- Optimization of business processes
- Organization change management

Migrate

- Implementation of SAP S/4HANA solution
- · Greenfield/brownfield + SLO services
- Data migration to the new platform
- · Validation and maintaining the project over time

Our S/4HANA assessment roadmap

The S/4HANA transition requires a deep understanding of the business structures and proper analysis of technical impacts. Unlock your SAP S/4HANA investment's full potential with Kellton. We create business value by performing an assessment of your current SAP landscape's functionality, cutting through technical complexity, and predicting your migration success. We assess your current state, establish clear goals, and anticipate the business impact of the transition.

Kellton's proven and modular approach to SAP S/4HANA assessment framework helps you imagine and realize a better future by digitizing your business and achieving profitable growth. From initial proof of concepts to full production conversions, our certified SAP experts conduct a rigorous assessment of business constraints, adoption approach, target landscape, and S4/HANA adoption drivers to create competitive differentiation.

Steps involved in our S/4HANA assessment roadmap:

Scope project

- · Connect with customer basis team and collect customer IT Landscape diagram
- Facilitate customer in getting SAP pathfinder, BSR, FAR, and SAP readiness check reports
- Generate SAP transformation navigator reports

Assess status quo

- Share Kellton SAP assessment questionnaire with customer IT & business teams
- · Conduct discovery workshops with customer's team to understand the challenges and wish list
- Discuss and evaluate business process improvements

SAP best practices analysis

- Discuss and evaluate SAP readiness check report
- Evaluate business processes vis-à-vis industry/SAP best practices
- Evaluate S/4HANA simplification list for business impact

Evaluation of SAP roadmap

- Discuss and evaluate the strategy on: Master Data | Chart of accounts | Analytics | Information lifecycle | User experience | Data migration | Testing | Training | Downtime
- Discuss and evaluate SAP roadmap viewer

Assessment report

- Pre-final report review with customer key stakeholders
- · Incorporate observations and recommendations of the customer's key stakeholders
- Final presentation and submission of assessment report and Closure of discovery phase

About us

We are a pioneer in SAP S/4HANA migration, implementation and consulting with 13+ years of SAP experience and cutting-edge digital transformation solutions. Success stories

Financial system integration turning insights into action (Howard Energy Partners)

A leading midstream provider was struggling with disparate financial systems and sluggish performance of mobility solutions. After a thorough analysis, Kellton chose **SAP S/4HANA Finance** for our client's new ERP system along with SAP Business Planning and Consolidation (SAP BPC) for real-time insights and predictive decision-making. We delivered one single integrated view into financial processes and two fold increase in user engagement.

Par Pacific

SAP S/4HANA implementation for a leading oil and gas company (Par Pacific)

A leading production company in the oil and gas industry with a 94,000-bpd (barrels per day) refinery was lacking scalability and business agility because of complicated architectures. We performed **S/4HANA Simple Finance implementation** which provided a single version of the truth and enabled faster period-end closing with improved user productivity through role-based Fiori Apps.

David DevichCIO, Momentive Technologies

"We chose a greenfield implementation despite significant risks, including a pandemic. We knew our team was strong but added support from Kellton, SAP and AWS gave us the confidence to proceed."
