SAP on Azure · Accelerate Your SAP Digital Core on the Cloud

Backed by 15+ years of SAP expertise and Microsoft Partnership, we offer comprehensive assessment, advisory, and end-to-end migration services—tailored for enterprises seeking seamless transition to SAP S/4HANA or RISE with SAP on Azure.

Kellton for SAP on Azure

Latest tech innovations

We scale existing architecture and accelerate data processing by leveraging built-in machine learning, predictive analytics, and optimized processes.

On-time, in-budget services

We offer a comprehensive range of implementation and migration services, delivered on time and on budget, enabling businesses to achieve next-generation intelligent operations.

Industry's best SAP team

Our highly experienced and certified team of developers, architects, and solution engineers, have proven skillsets in SAP Azure migration, enabling businesses to achieve tangible business outcomes.

Secure & seamless integration

We seamlessly integrate with core ERP systems by running the entire business on a single, Azure-based software solution and safely storing your data on world-class servers.

PCOE certification

We are among the top 5% of global SAP transformation partners with the most rigorous SAP quality standard compliance.

Rapid implementations

We help businesses move their traditional ERPs to intelligent Azure solutions with greater speed and efficiency while reducing their infrastructure costs and system downtime.

| by Kellton

With Microsoft Azure as the backbone, the platform ensures seamless data connectivity, secure integration, and high interoperability, unlocking optimization benefits at every stage of operation.
